FOR IMMEDIATE RELEASE

Eisai Co., Ltd.
Allm Inc.

Eisai and Allm Enter Into Capital and Business Alliance Agreement for ICT Healthcare Solutions

Eisai Co., Ltd. (Headquarters: Tokyo, CEO: Haruo Naito, "Eisai") and Allm Inc. (Headquarters: Tokyo, Representative Director and President: Teppei Sakano, "Allm") today announced that they have entered into a capital and business alliance agreement for ICT digital health solutions in various areas as well as regional medical treatment and care. Under this capital and business alliance, the two companies will collaborate on information provision to patients and healthcare professionals as well as development and provision of digital health solutions in regional medical treatment cooperation and comprehensive community care by extensively utilizing Allm's ICT systems for medical treatment and care. By applying Allm's experience in medical ICT systems to the "Dementia Ecosystem" that Eisai aims to establish, the two companies will thoroughly promote the utilization of IoT, big data and AI technologies in the health care area and provide new value for patients under the Fourth Industrial Revolution.

In its medium-term business plan EWAY2025, Eisai is aiming to become a "Medico Societal Innovator" (a company that changes society through creating medicines and providing solutions), promoting various kinds of digitalization such as the analysis of big data including real world data for the development of diagnostic methods and the provision of solutions in addition to creating next-generation treatment primarily in "neurology" and "oncology" that are Eisai's therapeutic areas of focus. Especially in the area of dementia, Eisai aims to establish the "Eisai Dementia Platform" by actively utilizing external big data and genomic data in addition to Eisai's own experience, know-how, and clinical data as well as build the "Dementia Ecosystem" by collaborating with partners such as other pharmaceutical companies, governments, medical organizations, care facilities, diagnostic developing companies, IT companies and insurance companies. Eisai thus aims to deliver novel benefits to patients with dementia and their families.

As "a company supporting all medicines (All Medical)", Allm upholds "Shaping Healthcare" as its corporate message, and provides services making contributions to the creation of global, social welfare design through IT technology. As a venture company specialized in medicine and healthcare, Allm is engaged in the development of programs for medical devices and provides "Team" comprehensive community care application and "MySOS" personal health record app. Currently operating in 12 countries, the company internationally provides approximately 1,700 medical/nursing institutions with ICT systems for medicine and nursing. In particular, the "Join" communication app for communication among healthcare professionals has become Japan's first medical device program which was made eligible for national health insurance by the Central Social Insurance Medical Council of the Japanese Ministry of Health, Labor and Welfare.

Through these efforts to coordinate on the provision of healthcare solutions using ICT and the establishment of ecosystems in the area of dementia and others, Eisai and Allm are working to solve issues in regional medical treatment and care, and therefore contribution to the realization of well-being.
