EISAI ITALY AWARDED HIGHEST CLASSIFICATION AT FIFTH ANNUAL WELFARE INDEX PMI* IN ITALY

On November 23, 2020 (local time), Eisai's Italian pharmaceutical sales subsidiary Eisai S.r.l. (location: Milan, "Eisai Italy") was awarded the 5W - Champion classification as the highest level on the Welfare Index PMI, one of the most important indices for employee welfare in Italy.

More than 4,000 small and medium sized companies participated in the Welfare Index PMI, and were evaluated in twelve main areas, including supplementary pension provision, supplementary healthcare, work-life balance, and economic support. The companies were then classified on a Welfare level from 1W to 5W based on the content and originality of their welfare policies and initiatives. This year, in addition to the traditional survey, the Welfare Index PMI detected also the impact of the Covid-19 emergency, highlighting the flexibility and resilience of these companies. 78 companies were awarded the 5W - Champion classification.

This time Eisai Italy was classified as a 5W - Champion (level: 5W), which follows the same level of award it received in 2019, and 4W - Leader classification in 2018, the first year that Eisai Italy participated.

*Piccole Medie Imprese (PMI): small and medium sized companies
