

**EISAI TO PRESENT LATEST DATA ON ERIBULIN  
AT 39TH ANNUAL SAN ANTONIO BREAST CANCER SYMPOSIUM**

Eisai Co., Ltd. (Headquarters: Tokyo, CEO: Haruo Naito, “Eisai”) announced today that a series of abstracts highlighting the latest clinical data on its in-house developed halichondrin class microtubule dynamics inhibitor eribulin mesylate (product name: Halaven<sup>®</sup>, “eribulin”) will be presented at the San Antonio Breast Cancer Symposium (SABCS2016) taking place in San Antonio, the United States, from December 6 to 10.

Three abstract poster presentations (including outcome research data) are to be given at the meeting, with the main presentation featuring the results of an interim analysis of a Phase Ib/II trial (Study 218) of eribulin in combination with the immune checkpoint inhibitor pembrolizumab in patients with metastatic triple-negative breast cancer.

Eisai positions oncology as a key franchise area and is aiming to discover revolutionary new medicines with the potential to cure cancer. The company will continue to create innovation in the development of new drugs based on cutting-edge cancer research, and in doing so seeks to make further contributions to address the diversified needs of, and to increase the benefits provided to, patients and their families as well as to healthcare providers.

Major Eisai abstracts accepted for presentation at SABCS2016 include:

<b>Product</b>	<b>Abstract title and scheduled presentation date and time (local time)</b>
Eribulin Abstract P5-15-02	Phase Ib/II study to evaluate eribulin mesylate in combination with pembrolizumab in patients with metastatic triple-negative breast cancer <b>Poster Presentation</b>   December 9 (Fri), 17:00-19:00
Eribulin Abstract No: OT2-02-02	A randomized, open-label, multicenter, Phase Ib/II study of eribulin mesylate in combination with PEGylated recombinant human hyaluronidase (PEGPH20) versus eribulin mesylate alone in patients with human epidermal growth factor receptor 2 (HER2)-negative, high-hyaluronan metastatic breast cancer <b>Poster Presentation</b>   December 8 (Thu), 17:00-19:00
Eribulin Abstract No: P5-15-16	Utilization and outcomes of eribulin in triple-negative metastatic breast cancer: real-world findings <b>Poster Presentation</b>   December 9 (Fri), 17:00-19:00
